

SIMPLIFY ENERGY MONITORING!

LC Associates Real Time Energy Dashboard makes it easier and faster to visualize and transform building operations data into performance improvements, which automates the delivery of Business Intelligence as it relates to all facets of Energy Services.

- Overview of energy consumption throughout the day, month, and year
- Business Analytics on energy prices, usage, trends and rate analysis
- Leverage information to make strategic energy purchases and win concessions from suppliers
- View Demand Response Performance
- Save money and enhance sustainability
- Find savings in peak demand, and drift in efficiencies
- Track all your key building metrics and access to the information you need to know wherever you are!

REAL TIME DATA FOR REAL TIME SAVINGS

Visualize and interact with data using filters.

Take snapshots and change presentation features.

Select different meters and compare data
